

1. Your new logger comes ready to go.

Simply press and hold the  button until the green LED lights up to start logging.

2. Now place your logger in the location you want to monitor.

Once logging, pressing the  button will light up an LED to give a quick indication of the status. It will also add a marker to the data to show that you have checked it.

	<p><b>Green single flash</b> The data logger is currently logging</p>	<p>No action required</p>
	<p><b>Green double flash</b> The data logger's memory is full</p>	<p>Plug your logger in to a PC and download your readings</p>
	<p><b>No LEDs flash</b> The data logger is stopped or the battery is flat</p>	<p>Check the logger's status using the PC software</p>

3. When you are ready to view the recorded data on your logger, download the EasyLog CC software.

**LogTag software**  
LogTag Analysis software provides an easy to use, very powerful platform for configuring, downloading and analyzing the data from the LogTag recorder.  
[Download now](#)

**Paksense software**  
For a comprehensive overview of the temperature fluctuations that occurred during distribution, all temperature readings are displayed in a spreadsheet.  
[Download now](#)

**Lascar software**  
**EasyLog Cold Chain**  
Version 2.0 of our EasyLog Cold Chain software, compatible with 32-bit and 64-bit versions of Windows 7, 8 and 10. Lascar's EL-CC Coldchain data loggers are supplied with free configuration software for all data loggers in the EL-CC-1 and EL-CC-2 range.  
As loggers are pre-configured, there is no step-up required. Instead, simply click Prime Logger to start logging; Save Data to download data from the logger or View Previous Data to see previous logging sessions.  
[Download app here](#)

**TrackerSense App**  
TrackerSense Mobile is an easy to use app that displays where your TrackerSense GPS/LBS devices are on a map. This app only works in conjunction with TrackerSense GPS trackers.  
[Download app here](#)

Double click on the downloaded **EasyLog CC Installer.exe** file, and follow the on screen prompts.

4. To save your data, remove the logger from the plastic sleeve and connect it to a USB port.

Open the EasyLog CC software and click on **Save Data**.

This will automatically open up your readings in the EasyLogGraph software, where you can view your data or export it in various formats.
